

FROM INSIGHT TO ORBIT

LAUNCH YOUR
STUDENTS INTO THE
GLOBAL SPACE
INNOVATION ARENA

traveldegama.com

**A world-class
mentorship program
guiding young minds
from curiosity to
confident global
presentation.**

**Travel De Gama's ISDC
2026 Training Program.**

What is ISDC?

International Space Development Conference (ISDC)

A prestigious global platform by the National Space Society (NSS) since 1982, celebrating innovation and collaboration in space science and technology.

Through competitions like the Space Settlement Design Contest, ISDC empowers students to design visionary space habitats and become future leaders in space exploration.

Currently the contest is officially called the NSS Gerard K. O'Neill Space Settlement Contest, with winning entries featured at ISDC and NASA platforms, fostering future space leaders.

**1982
NSS**

National Space Society (NSS) establishes

1994

San José State University and NASA Initiate the Space Settlement Design Contest, receiving 23 entries from 60 students in its first year.

**2000 –
2010's**

The contest gains global recognition, expanding across Asia, Europe, and the Americas, with submissions surpassing 1,500 innovative space habitat designs by 2010.

2018

Over 2,500 submissions from more than 10,000 students mark a milestone in global outreach.

Present

Every student has **potential**. But not every student gets a **platform**.

- Talented kids struggle to translate ideas into competitive outcomes
- Lack of expert-led personalized guidance to prepare for global competitions
- Focus on participation, not distinction

We don't just train for the **ISDC**.
We craft **confident, research-driven, globally ready innovators**.

How we do it?

- Proven track record of creating **Global Champions** since **2016**
- Aligned with NEP, IB ATL, and innovation rubrics
- **Personalized mentoring**, mock **judging**, and final **submission support**
- Impact assessment built with Marzano & SOLO taxonomy
- **Growth mapped** across 5 core 21st-century competencies
- Detailed Curriculum with personalised tracks

Join a program that **turns presentations into podiums**.

Because the next space pioneer might just be sitting in your classroom.

**30,000+
Student
Journeys
Shaped**

Project Vision and Mission

- **Foster Scientific Thinking** by enabling students to apply inquiry, evidence-based reasoning, and domain-specific knowledge to solve complex space-related challenges.
- **Develop Higher-Order Cognitive Skills** such as problem framing, analysis, synthesis, and evaluation, using Marzano's and SOLO taxonomy frameworks.
- **Nurture Personal Growth** through metacognitive reflection, collaboration, self-regulation, and goal-directed behavior, preparing students for global engagement and lifelong learning.

Through this program, we aim to advance scientific thinking, cognitive skills, and personal dispositions by employing a pedagogically aligned, research-driven approach to domain knowledge development.

Student Deliverables

- A student kit with report formats and templates
- A research paper/project based on a space science theme
- Documentation of project development
- Final presentation materials (for selected students)
- Pre- and post-assessment

Phase 1 – Orientation & Topic Finalization

Phase 2 – Research & Mentorship

Phase 3 – Project Development

Phase 4 – Final Submission to NSS

Phase 5 – Presentation at ISDC (USA)
[Selected Students]

Project Overview

An intensive 50 hour – 20 module – journey blending science, creativity, research, and impactful storytelling.

4

Mission Ready

Final edits, mock judging, and submission support

3

Ignition

Dive deep into prototyping, teamwork, data & design

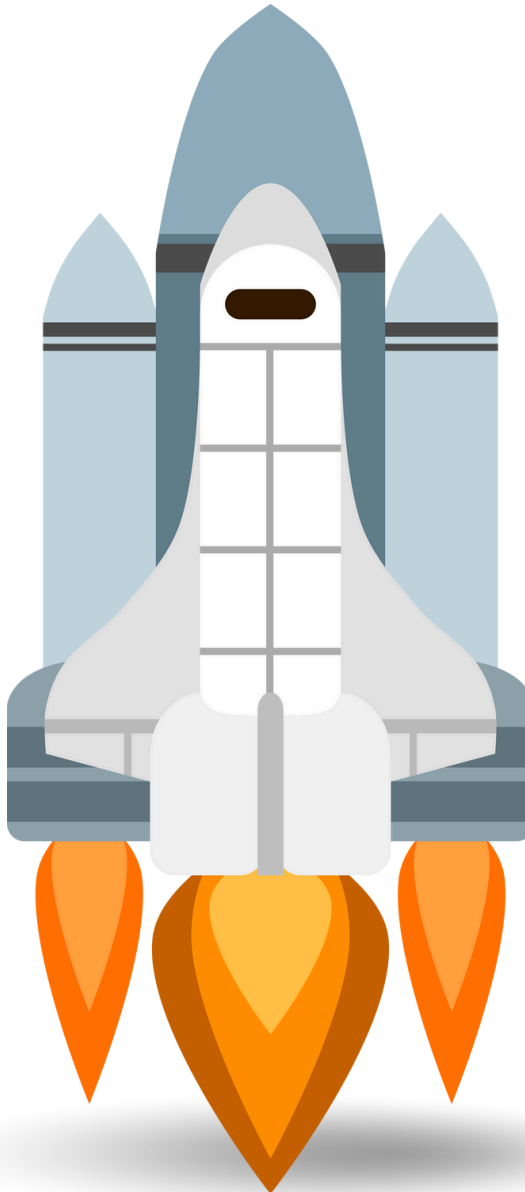

2

Track-Split

Choose Poster or Oral track; learn research + ideation

1

Lift-Off

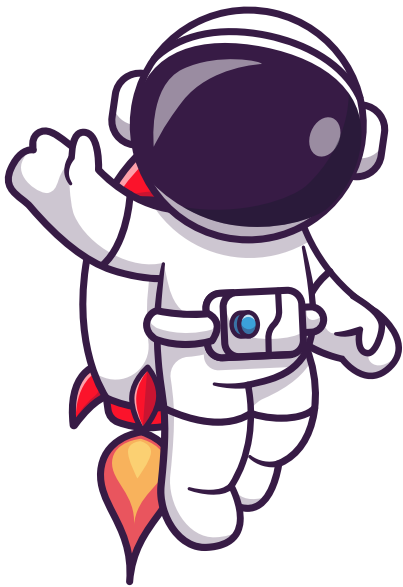

What you will get!

- 18 Live Hybrid Sessions
- On-boarding Kits
- Templates
- Mentor support
- Regular Feedback
- Reflections
- Mock Presentations

Tracks Measured

- Space Concept Mastery
- Research Skills
- Collaboration
- Creativity & Communication
- Scientific Temperament

Learning Outcomes

- **Analyze** space science concepts and synthesize innovative design solutions.
- **Design** practical models using structured problem-solving.
- **Collaborate** to plan, develop, and manage team projects.
- **Communicate** technical ideas through presentations and reports.
- **Evaluate** data and decisions using critical thinking.
- **Apply** global perspectives in teamwork and innovation.
- **Reflect** on feedback to improve project outcomes.

Other Benefits

- National Level winners awarded with Certificate and Letter of Recommendation
- Certificate of Participation from ISDC, USA
- Letter of Invitation from NSS for All Participants to Attend ISDC
- Opportunity to present at an international scientific platform
- Mentoring by professionals in the field of space science
- Exposure to global space initiatives and like-minded peers

A Once-in-a-Lifetime Opportunity to Interact with Pioneers of Space Exploration

From astronauts and scientists to futurists and entrepreneurs, ISDC has always been a gathering of legends. At ISDC 2026, students will have the rare opportunity to meet and learn from those shaping humanity's future in space.

Past & Featured Speakers Include:

- **Elon Musk** – Driving humanity's mission to Mars with SpaceX.
- **Jeff Bezos** – Building a future of space industry with Blue Origin.
- **Neil deGrasse Tyson** – World-renowned astrophysicist and science communicator.
- **Buzz Aldrin** – Apollo 11 astronaut and second man on the Moon.
- **Dr. Martine Rothblatt** – Visionary in biotech and space settlement.
- **Jared Isaacman** – Civilian astronaut and leader of Polaris & Inspiration4.
- **Robert Zubrin** – Architect of the Mars Direct plan and space policy advocate.
- **Rick Armstrong** – Son of Neil Armstrong, continuing the legacy of lunar exploration

School-Wide Impact

- **Global Platform** to represent India
- Plug-and-play curriculum with hybrid **mentoring**
- **Templates, assessments,** and **evaluation rubrics**
- Final **project review**, editing, and submission help
- Growth charts to track student improvement
- Custom **certificates** and Letter of Recommendation for standout students
- A **future-ready** innovation culture embedded in your classrooms

Championed the 2025 winners

Bringing international recognition to India, S.R.N. Mehta CBSE School of Kalaburagi has secured the first prize in the 8th grade category of the prestigious NASA Ames Research Center, National Space Society (NSS) for the Space Settlement Design Contest 2025.
